ONGUARD
ONE MEAN
LOCK™

ONGUARD®

OnGuard makes the meanest, toughest locks in the business. Packed with features inside and out, we deliver the best in security, value, and service. On the inside, OnGuard locks earn the highest safety ratings with double and quad-locking mechanisms, bump-resistant cylinders, and hardened steel shackles and chains. On the outside, our locks are fully-coated to protect your bicycle or powersport vehicle from scratches and to shield internal parts from the elements, while the bright color scheme sends a clear warning to thieves: don't even try! And then there's the extras: all-tube mounting brackets, five laser cut keys, key-code registration, comprehensive anti-theft programs, limited lifetime warranties and the best sales and customer support team in the business. The choice is clear. OnGuard: One Mean Lock.™.

OUR SECURITY RATING SYSTEM

Comparing locks has never been easier.

Determine the security level needed:

RED: Ultimate security for inner city and high crime areas.

BLUE: High security for medium crime areas.

GREEN: Base security for low to moderate crime areas.

Use the numbers within the color level to compare locks - the higher the number, the more security provided. This makes selecting the right lock simple and intuitive with up-selling opportunity.

X4P Quattro Bolt

X4P Quattro Bolt mechanism secures the shackle to the crossbar in four places maximizing strength to resist pulling, jacking, prying and twisting.

Pat. Pend.

X2P Dual Lock Down

Padlocks with X2P Dual Lock Down mechanisms secure both sides of the shackle for ultimate pull resistance.

ONGUARD INNOVATION MEANS MAXIMUM SECURITY

A lock is only as good as it's weakest link. And where some locks secure only one side of the shackle, OnGuard's patented X4P Quattro Bolt, X2P Double Bolt and X2P Dual Lock Down mechanisms secure both sides for a double-redundant system that resists attack from pulling, jacking and prying. And OnGuard's user-settable SBC Steel Ball Combo locks feature a high security click gear system that resists picking and pulling. Simply put, OnGuard lock technology means maximum security.

- n Shackle secured at both ends for a double-redundant system
- n Both sides of shackle must be defeated to open lock
- n Hardened steel throughout resists all forms of attack
- n Round profiles and smooth edges eliminate leverage points

Patented
US 7,823,424 B2

X2P Double Bolt

Cable locks with X2P Dual Lock Down mechanisms secure cable to lock head in two places for high pull and pry resistance.

Pat. Pend.

X2P Double Bolt

X2P Double Bolt mechanism secures both sides of the shackle to the crossbar for high resistance to pulling, jacking and prying.

Pat. Pend.

Steel Ball Combo

Steel Ball Combo locks use a smooth running, steel ball click gear system that resists picking and pulling.

PROTECTION, FEATURES, VALUE- ONGUARD GIVES YOU MORE

Of course OnGuard locks offer the best security in the business. But beyond that OnGuard locks are packed with user-friendly, value added features that make closing the sale a slam dunk. From the

pick, pull, drill and bump-proof protection of the new Z-Cylinder to new double rubber coatings to the new Twist Lock mounting bracket, nobody gives you more than OnGuard.

Z-Cylinder

The Z-Cylinder offers high pick protection and feature BumpBlock™ technology rendering bump keys useless. Lock mechanism is encased in ultra-hardened steel to resist drilling or pulling.

- n The unique construction makes the Z-Cylinder virtually pickproof
- n BumpBlock renders bump keys useless
- n Ultra-steel encased mechanism defeats drilling

BUMPBLOCK
Cylinder design prevents lock bumping

Laser-cut Keys

Locks equipped with Z-Cylinder systems come standard with 4 laser-cut keys plus 1 micro-light key for night use and can be keyed alike with other OnGuard Z-Cylinder locks. In the event that

replacement keys are needed, simply call OnGuard and with your key code (or register online after purchase) and replacement keys can be sent to you for a minimal fee.

GLO - Combo

No more fumbling with combinations in the dark. Our Doberman and Terrier Combo Glo locks feature backlit tumblers for ease of use after dark.

*Models 8031GLO, 8061 & 8062

Snap Lock QR Bracket

OnGuard Cable Locks come equipped with our new TwistLock QR Mounting Bracket is a complete redesign offering improved ease-of use. Simply attach the universal mounting bracket to any tube, insert the lock "T" fixture and twist. To release push the orange release lever and twist. Carrying your lock has never been easier.

Snap Lock QR Bracket

OnGuard U-Locks and cable locks come equipped with a universal mounting bracket that works with any size bicycle tube (22mm-80mm). Plus, the versatile design allows for a variety of placement options- down tube, top tube, seat post, offset, whatever- eliminating interference with cables, water bottle cages or other accessories. Soft rubber interface won't harm bike's finish.

More Protection

New double rubber coatings on U-lock crossbars and shackles and cable lock heads help protect paint and finishes while metal and thick rubber end caps protect against bumps and hits. Z-Cylinders feature new automatic and manual keyway seals to keep water, dirt and grit out of lock internals. Overall tolerances are tighter for better fit and increased resistance to the elements. Chain covers are embroidered, not screened, for long lasting good looks and feature Velcro tabs to keep covers in place to protect paint and finishes. Cables feature tough vinyl coatings on both cable and swedging for long lasting durability and protection.

Perfectly suited for cyclists and power sport users, OnGuard U-Locks offer our highest level of security in one convenient, easy-to-use design. OnGuard's wide range of shackle lengths, optional cables, pick, pull, bump and drill resistant Z-Cylinders or convenient combination locks, there's an OnGuard U-Lock that's exactly right for your security needs.

OnGuard U-locks feature:

- X4 and X2 locking mechanisms secure both sides of the shackle
- Hardened steel shackles are impervious to prying, jacking, or cutting
- Round profile and smooth edges eliminate leverage points
- Fully coated shackles and crossbar protects delicate finishes and paint jobs

X4P Quattro Bolt

X4P Quattro Bolt mechanism secures the shackle to the crossbar in four places maximizing strength to resist pulling, jacking, prying and twisting.

Patented
US 7,665,333 B2

X2P Double Bolt

X2P Double Bolt mechanism secures both sides of the shackle to the crossbar for high resistance to pulling, jacking and prying.

Pat. Pend.

Z-Cylinder

The Z-Cylinder offers high pick protection and feature BumpBlock™ technology rendering bump keys useless. Lock mechanism is encased in ultra-hardened steel to resist drilling or pulling.

ADDITIONAL FEATURES

Snap Lock Quick Release multi-position mounting bracket

5 laser cut keys (1 micro-light and 4 extra grip keys)
 Micro-light key projects a bright white beam

OnGuard chain locks offer bicycle owners and powersport enthusiasts extra length for locking versatility plus the highest level of security for use in high crime areas. Massive, titanium reinforced hexagonal links render hacksaws and bolt cutters virtually useless while tight inside link dimensions make prying impossible. Available in a wide variety of chain lengths and link sizes to match your security needs.

OnGuard Chain locks feature:

- Hexagonal and square links present more hardened surfaces than round links making sawing and cutting virtually impossible.
- Titanium surface hardening vastly increase cut and saw resistance.
- Embroidered nylon chain covers won't crack or peel for long lasting beauty.
- Velcro tabs keep cover in place to help protect paint and finishes.
- Comprehensive selection of locks types, chain lengths and link size to exactly match security needs.

Z-Cylinder

The Z-Cylinder offers high pick protection and feature BumpBlock™ technology rendering bump keys useless. Lock mechanism is encased in ultra-hardened steel to resist drilling or pulling.

Pat. Pend.

Cylinder design prevents lock bumping

X2P Double Bolt

Cable locks with X2P Dual Lock Down mechanisms secure cable to lock head in two places for high pull and pry resistance.

Patented
US 7,823,424 B2

X4P Quattro Bolt

X4P Quattro Bolt mechanism secures the shackle to the crossbar in four places maximizing strength to resist pulling, jacking, prying and twisting.

Patented
US 7,665,333 B2

X2P Dual Lock Down

Padlocks with X2P Dual Lock Down mechanisms secure both sides of the shackle for ultimate pull resistance

BEAST SERIES

- X4P Quattro Bolt Locking Mechanism locks shackle on four sides
- NEW Z-Cylinder is bump-proof and resists picking, pulling or drilling
- Massive 16.8mm (0.66") hardened steel shackle resists cutting, prying and jacking
- Rounded design and centered keyway eliminates pry points
- NEW co-molded crossbar cover and double rubber coated shackle protects finishes
- NEW all-metal end caps provide additional protection against hits and drops
- NEW automatic keyway covers helps seal lock internals against the elements
- 14mm (0.55") titanium reinforced, hardened steel hexagonal link chain resists cutting or prying
- Chain cover protects paint and finishes, embroidered logo won't flake or wear off
- Boxer U-lock can also be used as a disc lock

Locking Mechanism: X4P Quattro Bolt Z-Cylinder,
European Type

Tumbler Mechanism: Hardened Steel

Shackle Diameter: 16.8mm (0.66")

Coatings: Hardened Steel

Coatings: Co-molded Crossbar Cover with Metal End Caps

Keyway: Automatic Weather Resistant

Keys: 5 Laser Cut Keys, 1 With LED Micro-light

Anti-Theft Plan: \$5001 bicycle, \$1401 Powersport

Warranty: Lifetime

Extras: Embroidered chain cover

Beast | 8016

X4P Boxer short shackle U-lock mated to a 3.5' chain with massive 14mm (0.55") link titanium reinforced chain. Perfect for powersport users who travel fast but need maximum protection for high crime areas. Boxer U-lock can also be used alone as a disc lock.

Chain Dimensions: 110cm x 14mm (3.57' x 0.55")

Shackle Diameter: 16.8mm (0.66") Hardened Steel

Locks shown on this page feature X4P Quattro bolt locking mechanisms

Beast | 8016L

Same protection features as our awesome Beast 5016 with a longer 6-foot titanium reinforced, hardened steel chain; perfect for use with trailers, racks or anywhere a longer length, ultra-high security option is needed. Boxer U-lock can also be used alone as a disc lock.

Chain Dimensions: 180cm x 14mm (6' x 0.55")

Shackle Diameter: 16.8mm (0.66") Hardened Steel

BEAST SERIES | 8016, 8016L

Mastiff | 8020

3.5' 10mm (0.39") titanium reinforced hardened square link chain mated to an integrated X2P Dual Lock Down head featuring new double rubber cover for better protection against bumps and hits.

Chain Dimensions: 110cm x 10mm (3.57' x 0.39")

Mastiff | 8021

Longer 6' 10mm (0.39") titanium reinforced hardened square link chain with X2P Dual Lock Down head.

Chain Dimensions: 180cm x 10mm (6' x 0.39")

- Combo locks feature steel ball Click-Combo-Gear System that's user settable with 10,000 possible variations.
- NEW all-metal end caps provide additional protection against hits and drops
- 4-8mm (0.16-0.39") titanium reinforced, hardened steel square link chain resists cutting or prying
- Chain cover protects paint and finishes, embroidered logo won't flake or wear off

Note: Set your own four digit combination (10,000 variations) so no keys to lose or forget.

Locks shown on this page feature Steel Ball Click-Combo-Gear System

Mastiff | 8022C

User settable Steel Ball Combo lock is permanently forged to compact 2.5' 8mm (0.32") titanium reinforced hardened steel square link chain.

Chain Dimensions: 80cm x 8mm (2.59' x 0.32")

- Deadbolt Locking Mechanism for highest break resistance
- Armor protected hardened steel shackle for extra cut resistance
- 5 pin cylinder for extra pick resistance, Heavy duty stainless steel body with massive inner base for enhanced security
- Rotary style lock provides smooth, one-handed operation
- Tight shackle-to-body clearance eliminates pry points and makes cutting difficult
- 5 heavy-duty F-style keys
- 8mm (0.32") titanium reinforced, hardened steel square link chain resists cutting or prying
- Chain cover protects paint and finishes, embroidered logo won't flake or wear off

Mastiff | 8022D

Compact 2.5' 8mm (0.32") titanium reinforced hardened steel square link chain. Mastiff rotary lock with Deadbolt mechanism for added security.

Chain Dimensions: 80cm x 8mm (2.59' x 0.32")

Note: No light key

Mastiff | 8117

2.3' 10mm (0.39") titanium reinforced hardened square link chain mated to an integrated X2P Dual Lock Down head featuring new double rubber cover for better protection against bumps and hits.

Chain Dimensions: 70cm x 10mm (2.3' x 0.39")

Mastiff | 8118

4.92' 10mm (0.39") titanium reinforced hardened square link chain mated to an integrated X2P Dual Lock Down head featuring new double rubber cover for better protection against bumps and hits.

Chain Dimensions: 150cm x 10mm (4.92' x 0.39")

Mastiff | 8119

2.59' 8mm (0.32") titanium reinforced hardened square link chain mated to an integrated X2P Dual Lock Down head featuring new double rubber cover for better protection against bumps and hits.

Chain Dimensions: 80cm x 8mm (2.59' x 0.32")

Mastiff | 8123

User settable Steel Ball Combo lock is permanently forged to compact 2.5' 6mm (0.24") titanium reinforced hardened steel square link chain.

LOCKING TECHNOLOGY

Light weight, easy to carry and available with either keyed or combination lock mechanisms, coil cable locks offer bike riders fast, convenient security for medium to low risk situations. Heavy-duty steel cables are permanently forged to lock heads for added security, cables are vinyl coated to protect paint and finishes.

OnGuard Coil Cable locks feature:

- Heavy-duty steel cables are self-coiling for convenience.
- Vinyl coated cables protect paint and finishes.
- Lock heads are permanently forged to cable ends.
- Key locks feature X2P Double Bolt lock heads for ultimate pull resistance.
- Combo locks feature steel ball Click-Combo-Gear System that's user settable with 10,000 possible variations.
- Attached Velcro straps contain unruly coils during transport.
- Most models include NEW All-Tube Twist Lock mounting bracket.
- New Double Rubber Coated lock head covers protect paint and finishes

Lighter and easier to handle than chain locks, cable locks provide the extra protection of a heavy-duty twisted steel cable combined with X2P Double Bolt and Steel-Ball-Combo locks making them a great choice for cyclists and power sport users.

OnGuard Cable locks feature:

- Extra flexible steel cables for ease of use.
- Vinyl coatings protect paint and finishes.
- Lock heads are permanently forged to cable ends.
- X2P Double Bolt key lock for ultimate pull resistance.
- Steel Ball Combo lock is user-settable with 10,000 possible variations.
- Attached Velcro straps help contain cable during transport.
- New double rubber coated lock head cover protects paint and finishes
- Automatic or manual dust covers protect lock internals against the elements

Pat. Pend.

Z-Cylinder

The Z-Cylinder offers high pick protection and feature BumpBlock™ technology rendering bump keys useless. Lock mechanism is encased in ultra-hardened steel to resist drilling or pulling.

BUMPBLOCK
Cylinder design prevents lock bumping

Patented
US 7,823,424 B2

X2P Double Bolt

Cable locks with X2P Dual Lock Down mechanisms secure cable to lock head in two places for high pull and pry resistance.

Steel Ball Combo

Steel Ball Combo locks use a smooth running, steel ball click gear system that resists picking and pulling.

- Stainless steel combo lock with 8mm (0.32") hardened steel shackle

Shackle Diameter: 8mm (0.32") Hardened Steel

Disc locks provide motorcyclists and other power sports users outstanding security in a small convenient size. Shackle models work as a stand-alone rotor lock or with a chain for more locking options. Stapler and pin type models offer great protection against drive off thefts and easily fit in a pocket or tank bag. Most disc locks come with carrying case and disc reminder cable to prevent accidental drive aways.

OnGuard Disc locks feature:

- X4P lock mechanism on Boxers secure both sides of the shackle.
- Hardened steel shackles and pins resist prying, cutting or jacking
- Rubber coatings protect paint and finishes
- Most models include carrying case and disc reminder cable

Z-Cylinder

The Z-Cylinder offers high pick protection and feature BumpBlock™ technology rendering bump keys useless. Lock mechanism is encased in ultra-hardened steel to resist drilling or pulling.

X4P Quattro Bolt

X4P Quattro Bolt mechanism secures the shackle to the crossbar in four places maximizing strength to resist pulling, jacking, prying and twisting.

ADDITIONAL FEATURES

5 laser cut keys
(1 micro-light and 4 extra grip keys)
Micro-light key projects a bright white beam

Carrying pouch with belt clip
The disc reminder prevents riding away while disc lock is still engaged

Large 55mm x 55mm (2.17" x 2.17") opening fits many disc and rotor openings. 14mm (0.55") hardened steel shackle resists all attack from cutting, prying or jacking. X4P Quattro Bolt locking system secures the shackle on four sides for ultimate protection. Included disc reminder helps prevent accidental drive offs.

Shackle Diameter: 14mm (0.55") Hardened Steel

Disc Reminder | 8056

The disc reminder prevents riding away while disc lock is still engaged

BOXER SERIES

Small enough to fit in a jacket pocket or tank bag, disc locks are great for motorcyclists and other power sport users. Boxer Series shackle locks can be used as stand-alone rotor locks or combined with a chain or cable for more locking options. Stapler and pin type models offer great protection against drive off theft. Most locks come with carrying case and bright orange reminder cable to prevent accidental drive aways.

- Hardened steel shackles and pins resist prying, cutting or jacking
- Rubber coatings protect paint and finishes
- Most models include carrying case and disc reminder cable

120dB Alarm Chain Locks

OnGuard chain locks offer bicycle owners and powersport enthusiasts extra length for locking versatility plus the highest level of security for use in high crime areas. Massive, titanium reinforced hexagonal links render hacksaws and bolt cutters virtually useless while tight inside link dimensions make prying impossible. Available in a wide variety of chain lengths and link sizes to match your security needs.

Alarm Chain Locks feature:

- Hexagonal and square links present more hardened surfaces than round links making sawing and cutting virtually impossible.
- Titanium surface hardening vastly increase cut and saw resistance.
- Embroidered nylon chain covers won't crack or peel for long lasting beauty.
- Velcro tabs keep cover in place to help protect paint and finishes.
- Comprehensive selection of locks types, chain lengths and link size to exactly match security needs.
- Double Locking System
- Ice Spray-Proof Body & Key Barrel
- 10-14mm Carbide-Reinforced Locking Pin
- 120dB Alarm
- Auto Arm/Disarm
- Shock & Movement Sensors

ANTI-THEFT PROTECTION OFFER

Anti-theft protection available on all noted U-locks, chains and disc locks for up to three years of coverage. Provides protection and replacement of your bicycle or powersport vehicle up to the designated dollar amount should our product fail when used properly.

LIFETIME WARRANTY

All of our products are warranted to be free from mechanical defects for the lifetime of the product. If a mechanical defect occurs, we'll replace the product - free of charge.

We include 4 keys and 1 Microlight key for night-time use with most of our key locks.

Register your Z-Cylinder key code. If you lose your keys and you have registered them, or know your key number, replacement keys can be sent to you for a minimal fee.

KA

Most OnGuard locks can be keyed alike to each other as well as keyed alike to other OnGuard models that feature the Z-Cylinder™.

ONGUARD SECURITY RATING

Basic Security
This level offers basic theft resistance. Best used in low crime areas, suburban, recreational and rural areas. A quick way to secure your power sport when theft threat is low.

High Security
This level offers high theft resistance. Best used in high crime areas, campuses, suburban and recreational areas. This is a very high level of protection.

Ultimate Security
This level offers the ultimate theft resistance. Best used in major cities, top crime areas, downtown, campuses and urban areas where crime is high. This is your best defense.

Our products have been tested, approved and certified by the most important European test organizations that are dedicated to performing the harshest tests imaginable on locks. And the test results speak for themselves.
